

## PEER REVIEW:

Hi Rishaniya,

I was unable to create a pull request. I have attached the markdown file. You may upload it to your repository.

Thank you

Regards,

**Nazmul Hossain**

```
#### # File inspection
File inspection part looks good to me.
#### File Processing
Overall, File Processing looks good. However, I was unable to generate
the required files. I am not sure if it works for you. If it does, then
it's fine. Please check before final submission

#### Data visualization
I am getting some error while running. In SNPs per Chromosome, I get a
error 'object 'total SNPs' not found. Please check and make sure you have
included all the packages required.

Overall, It looks good to me. Great job! Please make sure to check before
final submission.
```

This was part of the review and I corrected the code previously and uploaded the output files into the repository but since there were several errors in the assignment I redid it and submitted the assignment.
